

Yusuf Wandana

Web Developer

A web developer with 2+ years of work experience in analyzing, designing, developing, testing and maintaining web application systems and API services. I have built over 10+ projects during my time as a web developer. I am still and will always improve my skills to become an expert software developer.

EXPERIENCES

PT. WAN Teknologi Internasional, Bogor

Web Developer

September 2021 - Present

- Analyze the client's desired application system flow.
- Design, develop, test, and maintain web application systems.
